Description
When managing parameterized classes, parameters can be overridden by-host, directly from the host's page. The same would be very useful to have on the hostgroup page: the ability to add per-hostgroup overrides/defaults for class parameters.

This seems to be a duplicate of [#2057](#2057)?

Note to self: hostgroup matcher syntax: "hostgroup=Parent Hostgroup/Nested Hostgroup". no quotes!

Hmm, one of the pain points I've got with the hostgroup= matcher, is that this only matches on equality, but other usages of hostgroups **exept this** inherit.
