Pull request:	
Description	
Array inside a hash are not merged (array and nested hash merges properly)	
I try to override a parameter on a host by adding an item to a list inside a hash but the list is not merged with the default value "Merge overrides" and "Merge default" enabled on the class parameter, datatype hash	
Default parameter value:	
<pre>myUser: sshkeys: - publicKey1</pre>	
I want to add a specific key on a host,	
host override value:	
<pre>myUser: sshkeys: - publicKey2</pre>	
Value kept on the host:	
<pre>myUser: sshkeys: - publicKey2</pre>	
Expected value on the host:	
<pre>myUser: sshkeys: - publicKey1 - publicKey2</pre>
