Pull request:	
Description #2121 added an requirement by default that permits access to puppetmaster interfaces if the connection has a trusted client SSL certificate and is from a registered smart proxy host. It should also support a list of hosts to avoid the need for the proxy. Unsure whether this should bypass the SSL requirement or not.

Revision 0323590f - 04/10/2013 04:18 AM - Dominic Cleal

fixes #2153 - add trusted_puppetmaster_hosts setting to permit puppetmaster access

Connections to fact + report upload and externalNodes will be permitted from any host listed in the trusted_puppetmaster_hosts setting, bypassing the requirement for a registered smart proxy.

Setting model updated to support empty arrays for values and defaults.
