Foreman - Bug #216

Validate uniqueness of a parameter name for Individual hosts.

04/16/2010 02:15 AM - Bash Shell

Status:	Closed	
Priority:	Normal	
Assignee:	Ohad Levy	
Category:	Database	
Target version:	0.1-5	
Difficulty:		**Fixed in Releases:**

Description

If a Host has two parameters of the same name with different values, will cause confusion.

Right now, the last parameter defined is the one that is returned in the YAML.

It would be better if duplicate parameter is flagged at creation/update time.
