<b>Pull request:</b>		
<b>Description</b>		

#### History

##### #1 - 11/16/2017 04:53 PM - Thomas Berger

- Subject changed from *SSL certificate chains are not honoured* to *SSL intermediate certificates are not honored for ssl\_cert*
- Category set to *Smart Proxy*
- Difficulty set to *easy*

If the client certificate, used to communicate with smart-proxy instances, is not signed by a root-CA, the intermediate CA certificates must be provided to the server.

Currently, if there is more than one certificate in the ssl\_cert file, only the first one gets used.

##### #2 - 11/16/2017 04:56 PM - The Foreman Bot

- Status changed from *New* to *Ready For Testing*
- Pull request <https://github.com/theforeman/foreman/pull/5012> added

##### #3 - 11/26/2018 01:23 AM - The Foreman Bot

- Status changed from *Ready For Testing* to *New*
- Pull request deleted (<https://github.com/theforeman/foreman/pull/5012>)

##### #4 - 08/06/2021 08:31 AM - Leos Stejskal

- Status changed from *New* to *Closed*

Hi, I'm closing the issue,  
it's been a while since the last update, if you think that the issue is still relevant please feel free to reopen it.
