Foreman - Feature #2170

Add support for ec2 tags during instance creation

02/01/2013 04:38 PM - Rolfe Von Stuppe

Pull request:	https://github.com/theforeman/foreman/pull/7154		

Description

It would be nice to add support on the Virtual Machine tab (when using EC2 as your cloud provider) for tags. My specific use case is my firstboot script (baked into my AMI) partially hinges upon an EC2 tag "Name" being set. Please let me know any other info needed about the request.

do you mean image creation or instance creation?
if its instance creation, then we already add the Name tag see

It would be nice to add additional tags other than Name.
For example, we often tag instances with account codes, so we know who is paying for them...

Maybe the web ui can provide fields to add additional tags.
