Description	
<p>After successfully installing 1.1rc5 with the installer and adding the local proxy to the config with the name "local proxy" I tried importing the environments but was greeted with a "500 internal server error". The following appeared in the foreman log:</p> <pre>Started GET "/environments/import_environments?proxy=1-local-proxy" for 10.99.0.1 at Sun Feb 03 17:37:30 +0100 2013 Processing by EnvironmentsController#import_environments as HTML Parameters: {"proxy"=>"1-local-proxy"} Operation FAILED: 500 Internal Server Error Rendered home/_topbar.rhtml (1.9ms) Rendered common/500.rhtml within layouts/application (9.8ms) Completed 500 Internal Server Error in 165ms (Views: 12.1ms ActiveRecord: 1.2ms)</pre>

Found the reason for this. When dealing with <http://projects.theforeman.org/issues/2172> I set the log file to STDOUT. Apparently foreman-proxy doesn't like this at all and this results in the 500 error. The proxy should probably not even start up when it doesn't like the log settings. That would make something like this easier to avoid.

- Project changed from *Installer* to *Smart Proxy*

#3 - 02/05/2013 04:31 AM - Dominic Cleal

- Subject changed from *In 1.1rc5 trying to import environments results in "500 internal error"* to *"500 internal error" when proxy log file is invalid*
- Priority changed from *Normal* to *Low*

#4 - 02/05/2013 04:32 AM - Dominic Cleal

- Status changed from *New* to *Closed*

Just noticed [#2174](#), which covers this.
