

Foreman - Bug #2180

VNC Console times out when SSL is enabled

02/04/2013 06:44 AM - Libor Zoubek

Status: Resolved	
Priority: Normal

Target version:	
Difficulty:	Fixed in Releases:
Triaged:	Found in Releases:
Bugzilla link:	Red Hat JIRA:
Pull request:	
Description	
Environment: foreman 1.1.RC4 running through nginx+passenger, ssl enabled (self-signed certificate)	
I am not able to connect to oVirt VNC console	
loading console hangs for a while on message: noVNC ready: native WebSockets, canvas rendering then it fails with: Connect timeout	
I can reproduce this issue on Firefox 18.0.1 and Opera 12.13 (both linux). This issue CANNOT be reproduced using Chromium (v24)	
Also this issue does not occur when SSL is disabled
