

Foreman - Bug #21816

Initialize dynflow executor in dev environment

11/30/2017 10:41 AM - Daniel Lobato Garcia

Status: Closed	
Priority: Normal

Pull request:	
Description	
<p>Since https://github.com/foreman/foreman/blob/develop/config/application.rb#L282 was introduced, dynflow tasks only start when the dynflow executor has been executed outside of the web server.</p> <p>In dev environments, we usually don't mind to run both the dynflow executor & Foreman in the same process, so that tasks can start right away.</p>
