

## Foreman - Feature #2186

### Support Proxmox VE as "Compute resources"-provider

02/06/2013 06:44 AM - Patrick Schönfeld

<b>Description</b> Hi,  Proxmox VE (proxmox.com) is a quiet nice virtualization environment, supporting some features often used in businesses. We use it in several environments together with foreman. That plays quiet nice, but it would be even better, if VMs could be created from within foreman.  So I'm requesting to implement a provider for it in the "Compute resources". It includes a RESTful interface, so integration probably shouldn't be a hard task.  Best Regards, Patrick

I would love to see this as well, I have tried looking into doing it myself, but gave up pretty quickly. As the company I work for pushes forward on our new ProxMox backed private cloud, I may have to revisit, but I would think that adding ProxMox support would be great for anyone wanting to stay open source and out of VMware's pocket.

- Description updated

Hi,

Before Foreman can support Proxmox, the under the hood libraly Fog must support it. Here is the relevant ticket on Fog :  
<https://github.com/fog/fog/issues/1328>

##### #3 - 05/25/2016 11:18 AM - Jean-Vincent kassi

Hello,

vagrant-proxmox is working good.  
Is it possible to add official support for proxmox 4 ?

Hi Benjamin,

Could you please let me know - what's the current status of this issue?

**#5 - 01/19/2017 07:39 AM - Anonymous**

The status of today is exactly the same. As long as there is no Proxmox provider for fog, no work regarding a Foreman plugin is possible.

Hi,

Use this for the implementation:

<https://github.com/nledez/proxmox>

**#8 - 07/28/2017 12:37 PM - Anonymous**

<https://github.com/fog/fog/issues/3644>

**#9 - 01/30/2018 09:30 AM - Stephan Eicher**

<https://github.com/tristanrobert/foreman-proxmox> looks like at least a beginning to support proxmox :)

**#10 - 04/27/2018 02:34 PM - Tristan Robert**

Hello,

Indeed, I started the project <https://github.com/tristanrobert/fog-proxmox>. It is a fog's module which allows proxmox to be used as a new compute resource in foreman.

You can follow the [project board](#) if you want to see how it goes.

I started the project <https://github.com/tristanrobert/foreman-proxmox> as a Foreman plugin which uses fog-proxmox.

I'm not sure the foreman team would like to put it in the core feature. It will depend on how many users are interested in it and how difficult it is to maintain.

When fog-proxmox have enough features, I will soon develop this foreman plugin.

**#11 - 06/01/2018 06:19 AM - Tristan Robert**

Hello,

[fog/fog-proxmox](#) has now its main features.

I am working actively on [foreman\\_proxmox plugin](#).

First release is coming soon...

**#12 - 06/30/2018 01:27 AM - Jason Harris**

- Triaged set to No

I just wanted to chime in that yes, this would be a great feature to have available. Currently our lab uses oVirt, and our main environment includes Satellite / RHEV. However, Proxmox support is demanded from some of our admins, so it would be great to be able to incorporate this into a cohesive, top-down solution.

Edit: Can't wait to see what you have in the plugin.

Hello,

The [gem](#) is published for the first time. Get version  $\geq 0.3.1$ .

You can then test it and give me feedback or contribute through the github project. Hope to be useful.

I work now on foreman packaging (deb, rpm, yum, installer) to ease installation and try to make it official.

**#15 - 09/08/2018 01:25 PM - Tristan Robert**

Hello, foreman\_fog\_proxmox is available in 0.5.0 release. It adds containers support. It is only available with Foreman 1.17. I work on next release in order to add 1.18 and 1.19 compatibility. Feedback is welcome. If you like it you can [support](#) it.

**#16 - 12/08/2018 01:58 PM - Anonymous**

- *Status changed from New to Resolved*

foreman\_fog\_proxmox is there now.
