

## Foreman - Bug #2187

### Script templates not working at all

02/06/2013 01:44 PM - Alejandro Falcon

<b>Status:</b> New

<b>Pull request:</b>	
<b>Description</b> I have latest Foreman installed from rpms, when I add a new script template kind it's added to the list but is non existent to any operation and isn't available from unattended url. Even more, when I rename the only working script template: grubby it keeps been accessible from original name and not from the new one.

Hi,

I do remember having successfully use script templates. Can you retry with the current version of Foreman and add details of what you are experiencing and how it goes well (or badly) for you?

Thanks
