Pull request: https://github.com/foreman/foreman/pull/5780	
Description	
Currently there are many rake tasks for upgrades that are called one-by-one in the installer. This means that for every upgrade step we need to write code for an additional task. I'd be much easier if there was a single task that wrapped all katello:upgrades:* tasks so we could simply do foreman-rake katello:upgrade.

Fixes #21938 - add pluggable upgrade rake task

This commit adds the ability for upgrade rake tasks to be defined within seeds. The installer can then run the upgrade:run rake task to run them. Tasks can be defined to run once or to always run when the upgrade:run master task is run.
