

Foreman - Bug #21983

Notifications invisible when using plugins with webpack assets

12/15/2017 09:45 AM - Daniel Lobato Garcia

Status: Resolved	
Priority: Normal

Description	
<p>Currently, in develop, if I have a plugin such as Katello, or remote execution (https://github.com/dLobatog/foreman_remote_execution/commits/13333), this branch contains webpack assets although no CSS, the notifications button is invisible. This happens because the CSS (<code>react_app/components/notifications/notifications.scss</code>) isn't loaded and without the appropriate styles the button font is too dark, the box is hidden behind the main body.</p> <p>I am not sure yet why this is happening, but I believe it's probably an error in Foreman itself, as it happens with both Katello/REX and another branch of Foreman_ansible that I have with React assets.</p> <p>See the attached files - whenever I have Katello installed, there are no styles for 'fa-bell-o' (defined in notifications.scss).</p>
