

Foreman - Bug #22051

Audit when users role(s) is updated

12/21/2017 09:06 AM - Swapnil Abnave

Status: Resolved	
Priority: Normal	
Assignee:	
Category: Audit Log	
Target version:	
Difficulty:	Fixed in Releases:
Triaged:	Found in Releases:
Bugzilla link:	Red Hat JIRA:
Pull request:	
Description As a user with view_audits permission I want to see user audit record creates when a role has been assigned to a user. Which actually means create 'audit' entry for roles being added/removed for a user.

This also means we need to create and audit when role permissions assignment through filters changes. So we need information like

Role "my viewer" has a new permission :view_hosts"

User "someone" roles changed, new roles are "my viewer", "manager"

#3 - 06/13/2018 12:57 PM - Marek Hulán

- Status changed from New to Resolved

I believe this has been added in 1.18, closing.
