Smart Proxy - Bug #2209

JSON output changes when ActiveRecord storeconfigs is in use

02/14/2013 07:19 AM - Dominic Cleal

Pull request:			

Description

When Puppet is configured with ActiveRecord-based storeconfigs, this causes the to_json impl from ActiveSupport to get loaded over the 'json' gem implementation.

This causes a different API output for Puppet environments, e.g.

```
$ curl http://192.168.122.90:8443/puppet/environments
[{"name":"test","paths":["/etc/puppet/modules"]},{"name":"production","paths":["/etc/puppet/modules"]}]
```

vs the normal:

```
$ curl -k https://192.168.101.10:8443/puppet/environments
["development","production"]
```

And then Foreman itself can't understand the data structure when importing classes:

```
undefined method `values' for []:Array
```

Hi,

I am getting the same issue.

Oops, we're sorry but something went wrong

Warning!
undefined method `values' for []:Array

If you feel this is an error with Foreman itself, please open a new issue with Foreman ticketing system, You would probably need to attach the Full trace and relevant log entries.

NoMethodError
undefined method `values' for []:Array
