| <b>Bugzilla link:</b> 1341228   | <b>Red Hat JIRA:</b>      |
| <b>Pull request:</b>  |                           |
| <b>Description</b>  |                           |
| Cloned from <a href="https://bugzilla.redhat.com/show_bug.cgi?id=1341228">https://bugzilla.redhat.com/show_bug.cgi?id=1341228</a> |                           |
| If an organization has a lot of subnets, it nice to have the sort functionality. Unfortunately it sorts in the wrong way.         |                           |
| I.e.  |                           |
| 10.71.12.0/24   |                           |
| 10.71.127.0/24  |                           |
| 10.71.13.0/24   |                           |
| ...   |                           |
| Correct would be  |                           |
| 10.71.12.0/24   |                           |
| 10.71.13.0/24   |                           |
| 10.71.127.0/24  |                           |
| ...   |                           |

#### History

##### #1 - 05/30/2018 09:39 AM - Marek Hulán

- Subject changed from *Sorting of Network address is in alphabetical order instead of numeric* to *Sorting of Network address is in alphabetical order instead of numeric*
