

Foreman - Bug #22139

Atomic Host 7.4.2 deployed from Foreman cannot be upgraded out of the box

01/03/2018 03:58 PM - Marek Hulán

Status: Closed	
Priority: Normal	
Assignee: Lukas Zapletal	
Category: Templates	
Target version:	
Difficulty:	Fixed in Releases: 1.20.0
Triaged: No	Found in Releases:
Bugzilla link: 1514013	Red Hat JIRA:
Pull request: https://github.com/theforeman/community-templates/pull/479	
Description Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1514013	
Description of problem: When deploying an Atomic Host machine (at least version 7.4.2) from Satellite, the ostree setup is wrong. This means 'atomic host upgrade' throws an error.	
Version-Release number of selected component (if applicable): Satellite 6.2.12, Atomic Host 7.4.2.	
How reproducible:	
Steps to Reproduce: 1. Install Satellite 6.2.12, sync in the current version of Atomic Host kickstart (which is 7.4.2) 2. install Atomic Host on new machine 3. Log into the new machine, run 'atomic host upgrade'	
Actual results: Error is thrown: error: /install/ostree: opendir(/install/ostree): No such file or directory	
Expected results: Machine is upgraded without issues.	
Additional info: Problem seems to stem from a change in the way subscription-manager handles ostree setup during deployment, in combination with the kickstart template in Satellite 6.2.12.	
Workaround: As a workaround, it's possible to run the following on the new machine to re-enable upgrades: ostree remote delete rhel-atomic-host ostree admin set-origin rhel-atomic-host-ostree https://very_long_satellite_url rhel-atomic-host/7/x86_64/standard
