| <b>Description</b>  |                           |
| Hi,   |                           |
| I've just deployed a new Puppet 3 master with Foreman and noticed that the puppet:import:hosts_and_facts task doesn't work anymore, as it can't correctly determine Puppet's \$vardir. This can be fixed with the following alteration: |                           |
| 48c48   |                           |
| <pre>&lt; dir = ENV['dir']    "#{Puppet[:vardir]}/yaml/facts"</pre>   |                           |
| ---   |                           |
| <pre>&gt; dir = ENV['dir']    "#{SETTINGS[:puppetvardir]}/yaml/facts"</pre>   |                           |
| in lib/tasks/puppet.rake. This utilizes the setting implemented by Dominic Cleal in this ticket:  |                           |
| <a href="http://projects.theforeman.org/issues/1994">http://projects.theforeman.org/issues/1994</a>   |                           |
| Thanks,   |                           |
| Andy  |                           |
