btw is this a 1.17 regression? could you add related issue if you have the introducing issue?

I think it has not been working long before 1.17, while it might be small enough fix for cherry-picking, I don't think we'd do 1.17.1 only because of this. The introducing issue was not provided. Of course leaving the decision on the owner of the release.

- translation missing: en.field_release changed from 297 to 360

Pushing out to 1.17.2, this won't be fixed in time for 1.17.1.
