

## Foreman - Support #2276

### Foreman should support multiple resource creation definition

03/04/2013 04:19 AM - Romain Vrignaud

<b>Status:</b> Rejected <b>Priority:</b> Normal <b>Assignee:</b> <b>Category:</b> Host creation <b>Target version:</b> <b>Triaged:</b> <b>Fixed in Releases:</b>	<b>Found in Releases:</b>
<b>Description</b> Like in Vagrant, Foreman should be able to instanciate multiples hosts with different hostgroup described in a file. This would allow to describe an application with many hosts in a file, and then ask foreman to instanciate all the hosts like vagrant can create all hosts with virtualbox.  See : <a href="http://docs.vagrantup.com/v1/docs/getting-started/introduction.html">http://docs.vagrantup.com/v1/docs/getting-started/introduction.html</a>  Any thoughts ?	
<b>Related issues:</b> Is duplicate of Foreman - Feature #7385: design a concept of deployment object <b>New</b>

Hello,

Another way to represent a complete architecture is to use TOSCA terminology.

The YAML version is available at:

<http://docs.oasis-open.org/tosca/TOSCA-Simple-Profile-YAML/v1.0-csd01/TOSCA-Simple-Profile-YAML-v1.0-csd01.pdf>
