Description	
When a user navigates to some foreman page via a turbolink link and then hits Back button in the browser, the previous page is displayed without react components.	
Steps to reproduce:	
<ol style="list-style-type: none">1. Go to Administer >> Roles.2. Click on [Filters] button of one of the roles and let the page load.3. Check that react components like notification drawer and menu is working.4. Hit Back button in the browser.5. Result: The notification icon disappeared and the sub-menu is dysfunctional.	
Another place where this can be reproduced is compute profiles page.
