Description

- Launched Foreman via init.d script

- Clicked Run on some node

- Got immediately error notice

- Nothing in logs

- Suspect permissions (i.e. foreman running under foreman account)

is this a puppet bug? or permission issue on the sudo side? do you have any more information about this problem?

This seems to be issue present only when Foreman runs under daemon.

When I su to foreman account, then launch the following command:

```
sudo /usr/sbin/puppetrun --host usdemo.test.com
```

It works normally.

By the way, there is nothing in logs -i.e. the cmd variable doesn't contain anything (whether 0 or any error code).

Just empty string.

do you have:

```
Defaults:foreman !requiretty
```

in your sudoers file?

That worked!

Please update the wiki for Puppetrun, as it contains only these instructions:

foreman ALL = NOPASSWD: /usr/sbin/puppetrun

You have wiki access too :)

it was documented in the puppet module for foreman :)
