Foreman - Bug #23225

breadcrumb switcher on host show page breaks if vm tab fails to load

04/11/2018 12:52 PM - Tomer Brisker

Pull request:	https://github.com/theforeman/foreman/pull/5437		

Description

the host vm tab only catches `ActionView::Template::Error`, which works if the error is in the template rendering, but if `find_vm_by_uuid` fails it throws a `ActiveRecord::RecordNotFound` exception which isn't caught by the controller, leading to the generic controller reply which includes the entire layout - including JS which is executed and breaks all the JS on the page.
