

## Foreman - Refactor #23300

### Do not use string interpolation when composing SQL queries.

04/17/2018 02:27 PM - Martin Povolny

<b>Description</b>		
Using string interpolation when composing SQL queries is just one step away from creating a security issue. It's against the Rails best practices to do so. Doing so actually results into Brakeman complaining loudly.		
Task: replace string interpolation with use of parameterization of queries and/or AREL.

Fixes #23300 - Brakeman SQL injections

Fix all foundings of SQL injections by  
Brakeman: "brakeman --test SQL"

### History

#### #1 - 04/18/2018 05:40 AM - Marek Hulán

- Status changed from New to Need more information

Could you share the list of such places? Or is that based on brakeman scan only? Was it just Foreman core or also some plugins that you've scanned?

#### #2 - 04/18/2018 08:22 PM - Anonymous

Brakeman is there: [http://ci.theforeman.org/job/test\\_brakeman](http://ci.theforeman.org/job/test_brakeman) (although that's going to be deleted soon). The Rails 5.2 warnings can be seen in the new deprecations in <https://github.com/foreman/foreman/pull/5428>

#### #3 - 04/19/2018 01:19 PM - Martin Povolny

I started with Brakeman scan and `grep` and with Foreman only and did not spend much time on this yet.

I think that basic checking should be done on regular basis possibly as part of the CI and also for plugins. Brakeman can be used and/or services such as Hakiri (<https://hakiri.io/>).

I don't have a list of issues. Initial one can be obtained by running Brakeman.

In my opinion as a starting point all issues reported by Brakeman should be fixed or marked as false positives in the Brakeman config file (to be included with Foreman).
