Description	
<p>I have some classes with lots of subclasses. When I assign a subclass to a host some of the subclasses can't be added anymore. When I click on the + nothing happens. I have to submit, go back to the host and add another class.</p> <p>I have attached a test class with subclasses test::test01 to test::test10. When I add test::test02 to a host, test::test01 becomes unavailable.</p>
