Description

reproduce:

1) query: facts.kernelrelease ~ * and host.hostgroup = Storage
2) bookmark this search
3) submit

nothing happens, can't even debug this.

History

#1 - 03/19/2013 04:52 AM - Dominic Cleal

I can't reproduce this on the latest 1.1 install, entering the query on the facts page.

If you're a non-admin user, can you check you're on the very latest 1.1 package available? There was an issue with AJAX queries not working on the first 1.1 release, this might affect it if you're not an admin.

Also if non-admin, check that you have the create_bookmarks permission granted in one of the user's roles.

Lastly, can you check /var/log/foreman/production.log for any requests when you click Submit?

I can confirm i'm on latest 1.1
I can confirm i'm not an admin user.

- Description updated

Hello

3 releases passed since you reported the issue. Do you still have the problem? Did you upgrade to 1.4.x?

Regards
