

Foreman - Bug #23427

[1.17.0] VMWare: creating new compute profile is unusable

04/27/2018 02:42 PM - Stephan Schultchen

<b>Status:</b>	Need more information		
<b>Priority:</b>	Normal		
<b>Assignee:</b>			
<b>Category:</b>	Compute resources - VMware		
<b>Target version:</b>			
<b>Difficulty:</b>		<b>Fixed in Releases:</b>	
<b>Triaged:</b>	Yes	<b>Found in Releases:</b>	1.17.0
<b>Bugzilla link:</b>		<b>Red Hat JIRA:</b>	
<b>Pull request:</b>			
<b>Description</b>			
when creating a new vmware compute profile, the yaml blob stored in the compute_attributes table in the vm_attrs field, is not functional.			
please see the attached "vmware_compute_profile_txt" file for examples of the stored yaml blob:			
there a 3 examples marked with:			
#PRE 1.17.0 profile			
#POST 1.17.0 profile			
#POST 1.17.0 profile FIXED			
the problem is with the "key" attribute from the volumes_attributes. if you remove this attribute, hosts can be created again with this compute profile

Hi,

Have you updated or applied the fix from:

<https://projects.theforeman.org/issues/23378>

Let us know how that works, that should resolve the issue. Marking this as Normal priority until I hear back.
