

Foreman - Bug #23427

[1.17.0] VMWare: creating new compute profile is unusable

04/27/2018 02:42 PM - Stephan Schultchen

Status: Need more information	
Priority: Normal	
Assignee:	
Category: Compute resources - VMware	
Target version:	
Difficulty:	Fixed in Releases:
Triaged: Yes	Found in Releases: 1.17.0
Bugzilla link:	Red Hat JIRA:
Pull request:	
Description	
when creating a new vmware compute profile, the yaml blob stored in the compute_attributes table in the vm_attrs field, is not functional.	
please see the attached "vmware_compute_profile_txt" file for examples of the stored yaml blob:	
there a 3 examples marked with:	
#PRE 1.17.0 profile #POST 1.17.0 profile #POST 1.17.0 profile FIXED	
the problem is with the "key" attribute from the volumes_attributes. if you remove this attribute, hosts can be created again with this compute profile

Hi,

Have you updated or applied the fix from:

<https://projects.theforeman.org/issues/23378>

Let us know how that works, that should resolve the issue. Marking this as Normal priority until I hear back.
