

Foreman - Bug #23463

YAML rendering of external nodes generates incorrect data if hashes are used

04/30/2018 04:14 PM - Anonymous

Status: Duplicate	
Priority: Normal

Category: Parameters	
Target version: 1.17.2	
Difficulty:	Fixed in Releases:
Triaged: No	Found in Releases: 1.17.0
Bugzilla link:	Red Hat JIRA:
Pull request:	
Description	
Rendering the external YAML data of a host causes Foreman to generate incorrect data if it includes hashes that are set in parameterised classes.	
Generated YAML:	
<pre>classes: easystack: ceph_monitors: - !ruby/hash:ActiveSupport::HashWithIndifferentAccess fqdn: [RETRACTED] ip: [RETRACTED] master: true - !ruby/hash:ActiveSupport::HashWithIndifferentAccess fqdn: [RETRACTED] ip: [RETRACTED] master: true - !ruby/hash:ActiveSupport::HashWithIndifferentAccess fqdn: [RETRACTED] ip: [RETRACTED] master: true</pre>	
This seems to be a duplicate of #9240 and was introduced again somewhere between 1.16.1 and 1.17.0.

History

#1 - 04/30/2018 04:16 PM - Anonymous

- Related to Bug #23382: Editing Smart Class Parameter of type YAML creates malformed value in release 1.17.0 added

#2 - 05/17/2018 10:54 AM - Tomer Brisker

- translation missing: en.field_release set to 360

#3 - 05/22/2018 04:18 PM - Tomer Brisker

- Category changed from API to Parameters

#4 - 07/04/2018 09:27 AM - Daniel Lobato Garcia

- Triaged set to No

Does anyone have a good reproducer for this one? I'm able to get the following hashes right:

```
classes:
  dhcp:
```

```
bootfiles:  
  '00:06': grub2/bootia32.efi  
  '00:07': grub2/bootx64.efi  
  '00:09': grub2/bootx64.efi
```
