

Foreman - Bug #2352

Uppercase hostnames are not preserved in routes due to certname/hostname mismatches, causing 404's

Description		
<p>When a user clicks on the hostname in the GUI, it throws a "Host not found" page. e.g. http://foreman:3000/hosts/1OFOURSERVERS.domain.tld If you then add a '/facts' in the above URL, it goes through successfully to the hosts' facts page. This also works with '/audits' and '/reports'.</p>
