<b>Description</b>	
<p>I have an external logging enabled (journal) and I noticed, the destroy audit messages are not being generated on deleting an org. I can see the audit created in the foreman UI tho.</p> <p>I tried to delete other items such as os and architecture, which correctly generated the audit message:</p> <pre>{   "SYSLOG_IDENTIFIER" : "foreman",   "SYSLOG_FACILITY" : "176",   "PRIORITY" : "6",   ...
