

## Foreman - Bug #23655

### vlan interface facts don't imported in case of ansible plugin

05/20/2018 02:10 PM - Maksim Malchuk

<b>Status:</b>	Ready For Testing	
<b>Priority:</b>	Normal	
<b>Assignee:</b>	Maksim Malchuk	
<b>Category:</b>	Facts	
<b>Target version:</b>		
<b>Difficulty:</b>	easy	<b>Fixed in Releases:</b>
<b>Triaged:</b>	Yes	<b>Found in Releases:</b> 1.17.0
<b>Bugzilla link:</b>		<b>Red Hat JIRA:</b>
<b>Pull request:</b>	<a href="https://github.com/foreman/foreman/pull/5597">https://github.com/foreman/foreman/pull/5597</a> , <a href="https://github.com/foreman/foreman/pull/5598">https://github.com/foreman/foreman/pull/5598</a> , <a href="https://github.com/foreman/foreman/pull/5599">https://github.com/foreman/foreman/pull/5599</a>	

#### Description

During facts import vlan interfaces parsed but not saved for the host:

```
2018-05-20T10:46:17 88de1713 [app] [D] We have following interfaces 'br-private, enp2s0f0, enp2s0f1, bond1.1005, br-ipo, br-ipo-nic, enp130s0f0, enp130s0f1, enp129s0f0, enp129s0f1, bond0, bond1' based on facts
2018-05-20T10:46:17 88de1713 [app] [D] Saving br_private NIC for host cloud-lab15.example.org
2018-05-20T10:46:18 88de1713 [app] [W] Saving br_private NIC for host cloud-lab15.example.org failed, skipping because:
2018-05-20T10:46:18 88de1713 [app] [W] Identifier has already been taken
2018-05-20T10:46:18 88de1713 [app] [D] Saving enp2s0f0 NIC for host cloud-lab15.example.org
2018-05-20T10:46:18 88de1713 [app] [D] Saving enp2s0f1 NIC for host cloud-lab15.example.org
2018-05-20T10:46:18 88de1713 [app] [D] Saving bond1.1005 NIC for host cloud-lab15.example.org
```

1. hammer host interface list --host-id 1

ID	IDENTIFIER	TYPE	MAC ADDRESS	IP ADDRESS	DNS NAME
8	bond1	bond	2c:9d:1e:b1:f5:f6		
7	bond0	bond	2c:9d:1e:b1:f5:f5		
1	enp129s0f1	interface (primary, provision)	2c:9d:1e:b1:f5:f6		cloud-lab15.example.org
6	enp129s0f0	interface	2c:9d:1e:b1:f5:f5		
5	br_ipo_nic	interface	52:54:00:cd:a9:9c		
4	br_ipo	interface	52:54:00:cd:a9:9c	192.168.1.1	
3	enp2s0f1	interface	2c:9d:1e:6c:d3:c6		
2	enp2s0f0	interface	2c:9d:1e:6c:d3:c5		

This is caused because of incomplete regexp matching and absence of vlans fact in case of ansible plugin.
