| Bugzilla link: 1573822 | Red Hat JIRA: |
| Pull request: https://github.com/Katello/katello/pull/7389 | |
| Description Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1573822 | |
| Description of problem: When trying to add a description to a composite content view, it throws below error message: "An error occurred updating the Content View: Cannot add repositories to a composite content view,Repositories from published Content Views are not allowed." | |
| Version-Release number of selected component (if applicable): 6.3.1 | |
| How reproducible: Always | |
| Steps to Reproduce: 1. Create a Composite Content View 2. Add repository (composite view) to it. 3. Publish Composite content view 4. Now goto Details tab and try to add description | |
| Actual results: Below error message: "An error occurred updating the Content View: Cannot add repositories to a composite content view,Repositories from published Content Views are not allowed." | |
| Expected results: Description should be updated to the composite content view | |
| Additional info: Using hammer or API you can update the description of the composite content view without issue. While doing so, from webUI, instead of taking only the description textarea in the form, it captures other information as well. | |
