Description

Description of problem:
A Puppet environment is not created properly because it is proposed for removal. There are several further actions that a user is required to do to create an Environment, which makes the UI button **Create Puppet Environment** useless.

How reproducible:
Always

Steps to Reproduce:
1. Navigate to **Configure** > **Environments**.
2. Click **Create Puppet Environment**
3. Submit creating a new environment
4. See how it is removed from the list after a minute

Actual results:
Puppet environment that is removed after creating

Expected results:
A proper Puppet environment
