Pull request:	https://github.com/theforeman/foreman/pull/5641	

Description

You may reproduce by creating a new box with Forklift (vagrant up centos7-katello-nightly).

Check out the attached screenshot, but basically without JS users can't even click on the vertical navigation bar.

As you can see, assets:precompile and webpack:compile don't work after installation.

```
vssh centos7-katello-nightly
