

## Foreman - Feature #23749

### Unclutter Settings page

05/30/2018 06:55 PM - Kavita Gaikwad

<b>Status:</b> New	
<b>Priority:</b> Normal	
<b>Assignee:</b>	
<b>Category:</b> Settings	
<b>Target version:</b>	
<b>Difficulty:</b>	<b>Fixed in Releases:</b>
<b>Triaged:</b>	<b>Found in Releases:</b>
<b>Bugzilla link:</b> 1517332	<b>Red Hat JIRA:</b>
<b>Pull request:</b>	
<b>Description</b> Cloned from <a href="https://bugzilla.redhat.com/show_bug.cgi?id=1517332">https://bugzilla.redhat.com/show_bug.cgi?id=1517332</a>	
<b>Description of problem:</b> The current settings dialog overwhelms non-regular users.	
<b>Version-Release number of selected component (if applicable):</b> Satellite 6.2.12	
<b>How reproducible:</b> always	
<b>Steps to Reproduce:</b> 1. open "Settings" on the Satellite	
<b>Actual results:</b> A large amount of settings in 9 categories, ordered by name	
<b>Expected results:</b> A clean and logic interface	
<b>Additional info:</b> (Detailed description from the support case)  Settings not grouped intuitive for the End user: The settings are sorted on the internal key name instead of grouped logical on functionality Below are a couple of examples: - Unstructured settings related to UI spread across multiple tabs and not grouped together host_power_status is in General tab Always show configuration status is in Puppet tab - Related settings shall be put together - Puppet 'Out of sync interval' is 2 lines above the related 'Puppet interval'. How shall the use understand those are related. - The description is not consistent with the use of the word 'Puppet' - All puppet populate from facts settings spread in Provisioning and Pupept - 'Update subnets from facts' is in Puppet, but 'Ignore facts for domain' is in Provisioning.  Settings are too much: Hide Advanced settings under 'Advanced' or 'More' because they distract from real user relevant settings Candidates for the Advanced settings are things like: - Certificate locations that are normally configured through the installer - Legacy puppet settings like 'Legacy Puppet hostname' and 'Puppetrun'

Roxanne had few things on her mind about this page, please keep her involved if you're redesigning it :-)
