Description

In foreman

```
--order ORDER                          Sort results
```

In katello

```
--order ORDER                          Sort field and order, eg. 'name DESC'
```

I think there should be consistency between the two, also we should display
`eg. id DESC` as name is not a field in all the tables we have.
