Description			
The concerns/api/api_controller.rb has a debug statement in process_action method. When docker pull directly against server (not crane :5000) the blobs (large binary data) is logged. Needs to be a way to either override this method or skip large bodies.

- Status changed from Duplicate to New

Not a duplicate. The fix in #23835 only fixes one case. Uploading RPM's, files, etc to a repository still get logged.
