

Katello - Bug #23801

Cannot sync Atomic kickstart nor RPMs

06/04/2018 01:24 PM - Daniel Lobato Garcia

Status: Resolved	
Priority: Normal	
Assignee: Partha Aji	
Category: Repositories	
Target version: Katello 3.7.1	
Difficulty:	Fixed in Releases:
Triaged: Yes	Found in Releases:
Bugzilla link:	Red Hat JIRA:
Pull request:	
Description	
Both the beta channel and the stable one throw different kinds of errors when you try to add these repositories.	
Check the attached pictures.	
Tested with katello development in forklift.

History

#1 - 06/04/2018 01:30 PM - Daniel Lobato Garcia

I refreshed my manifest to see if it makes any difference, but I get 'duplicate key value violates unique constraint "index_katello_pools_on_cp_id"' - might it be related?

#2 - 06/04/2018 01:31 PM - Daniel Lobato Garcia

#4 - 06/04/2018 02:26 PM - Thomas McKay

Fix for this bug should also include fix in error message code: The vars in string format are not all correct.

https://github.com/Katello/katello/blob/master/app/lib/katello/util/cdn_var_substitutor.rb#L31-L33

#5 - 06/05/2018 11:09 AM - Lukas Zapletal

For the record, I asked RH-RCM to add two lines into treeinfo files because Anaconda was not starting up stage2 for Atomic correctly. Not sure what they did tho and if this is related or not. Looks like they made some unrelated changes IMHO.

#6 - 06/06/2018 05:55 PM - John Mitsch

- Assignee set to Partha Aji

#7 - 06/13/2018 05:54 PM - Justin Sherrill

The 3rd error about the 'ostree_web_importer' is because the pulp ostree plugin is not installed. The first two errors are likely more of a concern.

#8 - 06/13/2018 05:55 PM - Justin Sherrill

- Related to Bug #23925: Atomic repos show up for enabling even if ostree plugin is not installed added

#9 - 06/13/2018 05:55 PM - Justin Sherrill

- translation missing: en.field_release set to 338

#10 - 08/03/2018 05:35 PM - Jonathon Turel

- Target version changed from Katello 3.7.0 to Katello 3.7.1

#11 - 09/05/2018 05:37 PM - Partha Aji

- Status changed from New to Resolved

Except for the one all the errors reported in the screen shots seem to have been fixed.

Adding an Atomic Host Beta kickstart gives a "The path /content/beta/rhel/atomic/7/x86_64/kickstart does not seem to be a valid repository. If you think this is an error, please try refreshing your manifest." . That is more of a cdn issue and not katello. So marking this resolved.
