Foreman - Bug #23832

Use pagination for associating vms, if compute resource supports it (such as ovirt)

06/06/2018 09:50 AM - Ivan Necas

Pull request:			

Description

Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1582563

Description of problem:

With large compute resoruce (e.g. 700+ VMs). While clicking the "Associate VM's" button for the compute resource gives " error: OVIRT::OvirtException Request Timeout."

Since loading all the vms at once cat take some time and timeout (as in this case), as well as it can be resource heavy, we should use pagination for loading the vms data.
