Template pxegrub2\_chainload issue with UEFI + SuSE

06/08/2018 02:05 PM - Martin Zimmermann

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Templates	
Target version:	1.19.0	
Difficulty:		Fixed in Releases: 1.19.0
Triaged:		Found in Releases: 1.17.1
Bugzilla link:		Red Hat JIRA:
Pull request:	https://github.com/theforeman/community-templates/pull/482	

**Description**

When a newly provisioned SuSE node boots for the first time, after the initial installation, the chainload Grub2 EFI from ESP fails (because the grubx64.efi file can't be found).

The SuSE UEFI bootloader can be found at this location:

- **SLES:**  
(\$root)/EFI/sles/grubx64.efi
- **OpenSuSE:**  
(\$root)/EFI/opensuse/grubx64.efi

This problem can be fixed easily by extending the "paths" array within the **pxegrub2\_chainload** template e.g.:

```
6c6
< paths = ["fedora", "redhat", "centos", "debian", "ubuntu", "Microsoft", "EFI"]
---
> paths = ["fedora", "redhat", "centos", "debian", "ubuntu", *"sles"*, *"opensuse"*, "Microsoft "
, "EFI"]
```

Please note, that in my example there are some \* characters, which should't be there (my mistake) ... so the array is supposed to look more like this:

```
6c6
< paths = ["fedora", "redhat", "centos", "debian", "ubuntu", "Microsoft", "EFI"]
---
> paths = ["fedora", "redhat", "centos", "debian", "ubuntu", "sles", "opensuse", "Microsoft", "EFI"]
```

- Tracker changed from Bug to Feature
- Difficulty deleted (trivial)

please open a pull request: [https://github.com/theforeman/community-templates/blob/develop/provisioning\\_templates/snippet/pxegrub2\\_chainload.erb](https://github.com/theforeman/community-templates/blob/develop/provisioning_templates/snippet/pxegrub2_chainload.erb)

maybe pxegrub\_chainload.erb also can get extended.
