Description
Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1589641

Description of problem: Browsing capsule puppet environments, Need to click twice on 'number of classes' to get the result

*Version-Release number of selected component (if applicable):*6.3.1

How reproducible: Always

Steps to Reproduce:
1. In Satellite, navigate to Infrastructure -> Capsules
2. Click on a Capsule name
3. Select the Puppet tab
4. Select the Environments sub tab
5. Click on any of the numbers in the "Number of classes" column

Actual results:
First click on "Number of classes" doesn't work

Expected results:
should list the puppet classes

Additional info: Should list puppet classes in the first click on the hyperlink

History

#1 - 06/12/2018 06:09 AM - Marek Hulán

- Subject changed from Browsing capsule puppet environments, Need to click twice on 'number of classes' to get the result to Browsing capsule puppet environments, Need to click twice on 'number of classes' to get the result

This is reproducible on 1.18 rc1, it seems it requires production env (tested on rpm installation). The first click goes to dashboard, if you click quickly enough again (double-click), it goes to the right page. It seems the first click removes something that is hovering on that link.
