Katello - Bug #23903

Removing subscription from manifest still shows repos to enable

06/12/2018 01:24 PM - Thomas McKay

Pull request:	https://github.com/Katello/katello/pull/7498		

Description

For my test:

+ import manifest w/ satellite subscription
+ enable and sync satellite rpms repo
+ refresh manifest from portal where satellite subscription had been removed
+ confirm that satellite repos are no longer listed to enable
+ confirm that the previously enabled repo is still present
+ confirm that the previously enabled repo is marked as "orphaned" in some way

These last three *confirm* steps are broken.

Revision 97a11e1c - 07/18/2018 02:16 PM - Justin Sherrill

Fixes #23903 - Hide repo sets without a valid subscription

This adds a new paramter to the repo sets api, to only return repo sets
that have an active subscription. This works well with the new UI which
seems to be built around this assumption. For hammer, we want to still
show either enabled repo sets or repo sets with an active sub, so the
new default behavior is to show only these.

With this change there is no way to view repo sets that either are
not enabled, or do not belong to a valid subscription.
