Description

Hey folks, 1.18 RC1 here, this was working previously in 1.16 and perhaps 1.17:

```
[root@foreman ~]# hammer location list
---|-----|-----|-----
ID | TITLE | NAME | DESCRIPTION
---|-----|-----|-----
2  | MyLoc | MyLoc |
---|-----|-----|-----

[root@foreman ~]# hammer organization list
---|-----|-----|-----
ID | TITLE | NAME | DESCRIPTION
---|-----|-----|-----
1  | MyOrg | MyOrg |
---|-----|-----|-----

[root@foreman ~]# hammer location add-organization --name MyLoc --organization MyOrg
Could not associate the organization:
  Resource location not found by id '2'
```

What I want to do is to associate Org with Loc.

Fixes #23918 - Find correct scope when updating taxonomy

It needs further investigation but it seems to be an API problem.

Hammer correctly finds the location by name and sends the id in url:

```

Could not associate the organization:
  Resource location not found by id '6'
```

But on server side the resource is not found, because the resource_scope is []. It might be related to recent changes in taxonomy scoping.

hammer location info --id 6 works normally.
