

Foreman - Feature #23923

Set template automatically if it's the only one when associating with OS

Description	
<p>When I create new OS every time I install fresh Foreman:</p> <pre>hammer os create --provisioning-templates "Kickstart default,Kickstart default finish,Kickstart default iPXE,Kickstart default PXELinux"</pre>	
<p>I need to manually set them in the GUI (Operatingsystem - Edit) because hammer os set-default-template only accepts IDs and it's clunky to use this subcommand.</p>	
<p>We can automatically set templates if they are the only one of some kind, that won't hurt. It looks like a small change.</p>	
<p>Note Katello already does its own auto-mapping, we would remove this once this is merged: https://github.com/Katello/katello/blob/master/app/models/katello/concerns/operatingsystem_extensions.rb#L14</p>
