### Description

Cloned from [https://bugzilla.redhat.com/show\\_bug.cgi?id=1585408](https://bugzilla.redhat.com/show_bug.cgi?id=1585408)

#### Description of problem:

SQL error when adding some puppet modules to CV: PG::UniqueViolation: ERROR: duplicate key value violates unique constraint "katello\_cv\_puppet\_modules\_name"

#### Version-Release number of selected component (if applicable):

satellite-6.4.0-9.beta.el7sat.noarch  
tfm-rubygem-hammer\_cli-0.13.0-1.el7sat.noarch

#### How reproducible:

happens for about 20% of modules

#### Steps to Reproduce:

```
1. Sync whole PuppetForge, create content view "MyCV"
2. # hammer --csv -u admin -p changeme puppet-module list \
> puppet-module-list.csv
3. # for u in $( cut -d ',' -f 5 puppet-module-list.csv ); do
hammer -u admin -p changeme content-view puppet-module add \
--content-view "MyCV" --organization "Default Organization" \
--uuid "$u"
done
```

#### Actual results:

Could not add the puppet module:  
PG::UniqueViolation: ERROR: duplicate key value violates unique constraint "katello\_cv\_puppet\_modules\_name"  
DETAIL: Key (name, content\_view\_id)=(sumo, 7) already exists.  
: INSERT INTO "katello\_content\_view\_puppet\_modules" ("content\_view\_id", "name", "author", "uuid", "created\_at", "updated\_at")  
VALUES (\$1, \$2, \$3, \$4, \$5, \$6) RETURNING "id"

#### Expected results:

Either should work or should provide some user friendly message

### Associated revisions

**Revision 403f7d48 - 06/15/2018 02:25 PM - Stephen Benjamin**

fixes #23945 - check for duplicate puppet module name in CV
