

## Foreman - Bug #23951

### Config group is not working with customer user role. (Failing with Stack level too deep)

06/15/2018 09:07 AM - Marek Hulán

<b>Status:</b>	Closed	
<b>Priority:</b>	Normal	
<b>Assignee:</b>	Marek Hulán	
<b>Category:</b>	Search	
<b>Target version:</b>	1.19.0	
<b>Difficulty:</b>		<b>Fixed in Releases:</b> 1.19.0
<b>Triaged:</b>		<b>Found in Releases:</b> 1.6.0
<b>Bugzilla link:</b>	1560672	<b>Red Hat JIRA:</b>
<b>Pull request:</b>	<a href="https://github.com/theforeman/foreman/pull/5698">https://github.com/theforeman/foreman/pull/5698</a>	
<b>Description</b> Cloned from <a href="https://bugzilla.redhat.com/show_bug.cgi?id=1560672">https://bugzilla.redhat.com/show_bug.cgi?id=1560672</a>		
<b>Description of problem:</b>  Created a role and set Resource type = Host and Search = Config Group. Assign this role to the user and login with the user which is using this customized role. Go to Hosts page, it shows error = Stack level too deep.		
<b>Version-Release number of selected component (if applicable):</b>  Satellite 6.2.12		
<b>How reproducible:</b> Always		
<b>Steps to Reproduce:</b>  1. Create a config group.  2. Add a role with resource type = Content Host, Host, Host Collection, Location and Host with config_group (Refer Image = 6.2.12.Customers_Filter-1.png)  3. and log in with that user and go to Hosts page in the satellite. We will get Stack level too deep error.		
<b>Actual results:</b>  Facing issue = Stack level too deep error		
<b>Expected results:</b> User should be able to view the all hosts page in satellite.		
<b>Additional info:</b> We have reproduced same on 6.2.12, 6.2.13 and 6.3.0 and we are getting the same error. While reproducing the issue we added some more resource types just confirm the permission details but we got the same error.
