

Foreman - Bug #23960

Foreman - "fips_enabled" Puppet Fact is not Parsed Correctly

Description As we are working towards enabling FIPS on RHEL7 systems in our environment, I opted to try and search for "Facts" > "facts.fips_enabled = false". However, strangely enough, the only value that I can select is "true" for this fact. This behavior is present in all three Foreman environments in our organization, so it's clearly not a fluke. In fact, in the one environment where FIPS has not been enabled on any systems, if I start to query "facts.f", fips_enabled isn't even an available fact to hone in on. In summary, Foreman doesn't appear to be pulling in the fips_enabled fact for any systems where the value is false. For what it's worth, I have confirmed that the various yaml files in /opt/puppetlabs/server/data/puppetserver/yaml/facts do contain "fips_enabled: false" entries for applicable systems. Feel free to let me know if I can provide any additional information, and thanks in advance for your assistance!
