Katello - Feature #24018

Searching for all instances of packages in all repos

06/20/2018 03:30 PM - Andrew Kofink

Status:	Closed		
Priority:	Normal		
Assignee:	Kavita Gaikwad		
Category:	Repositories		
Target version:	Katello 3.9.0		
Difficulty:		**Fixed in Releases:**	
Triaged:	Yes	**Found in Releases:**	
Bugzilla link:	1534608	**Red Hat JIRA:**	
Pull request:	https://github.com/Katello/katello/pull/7641		

Description

Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1534608

Description of problem:
Current search for packages within repositories does not allow one to search for all instances of packages in all repos. Specific repos must be specified.

Version-Release number of selected component (if applicable):
All

How reproducible:
Always

Steps to Reproduce:
1.Content>Packages>Select a package
2.Click on the Repositories tab
3. Notice that the first two drop downs require you to specify a Lifecycle and Content View

Actual results:
As is.

Expected results:
User would like to be able to search in All Lifecycles and All Content Views.

Acceptance criteria:

- Lifecycle Environment drop down contains "All Lifecycle Environments"
- Content View drop down contains "All Content Views"
- Repository search honors the value in each drop down
