

Katello - Bug #24023

hammer content-view create --repositories doesn't work with --name

06/20/2018 07:12 PM - Christine Fouant

Status: Closed	
Priority: Normal	
Assignee: Christine Fouant	
Category: Hammer	
Target version: Katello 3.7.0	
Difficulty:	Fixed in Releases:
Triaged:	Found in Releases:
Bugzilla link: 1585993	Red Hat JIRA:
Pull request: https://github.com/Katello/hammer-cli-katello/pull/564	
Description	
Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1585993	
Description of problem:	
whenever i try to create a content view with repositories attached to it (in a single command), it fails:	
1. hammer -u admin -p changeme --output=csv content-view create --product="qZUFXCqgilwMirUQuLZH" --organization-id="134" --repositories="HLWrPBJDOVDVyal" --name="foo" Could not create the content view: Error: one of repositories not found.	
the issues seems to be with using --repositories together with --name option. While --name parameter is required (content view name), when --repositories is used, hammer uses the value of --name while querying for the repositories, which obviously yields 0 results:	
1. hammer -d -u admin -p changeme --output=csv content-view create --product="qZUFXCqgilwMirUQuLZH" --organization-id="134" --repositories="HLWrPBJDOVDVyal" --name="foo" [INFO 2018-06-05T05:06:53 API] GET /katello/api/products/889/repositories [DEBUG 2018-06-05T05:06:53 API] Params: { "name" => "foo", "names" => [[0] "HLWrPBJDOVDVyal"] } [DEBUG 2018-06-05T05:06:53 API] Headers: { :params => { "name" => "foo", "names" => [[0] "HLWrPBJDOVDVyal"] } }	
Version-Release number of selected component (if applicable): 6.4.0-6	
How reproducible: always	
Steps to Reproduce: 1. # hammer -d -u admin -p changeme --output=csv content-view create --product="qZUFXCqgilwMirUQuLZH" --organization-id="134" --repositories="HLWrPBJDOVDVyal" --name="foo"	
Actual results:	

unable to locate the repositories as hammer puts the content-view name into the search query.

this is a regression from 6.3
